Construction will include, but not be limited to, all necessary roadway & bridge work, drainage, utility coordination, erosion & sediment control work items, substructure work, superstructure work & traffic control. Construction engineering & management including quality control, public involvement, & meeting all environmental commitments will be the responsibility of the contractor.

Project: RFP FOR A TELECOMMUNICATIONS PLANNING & DEVELOPMENT CONSULTANT TO PROVIDE A MASTER PLANNING INITIATIVE

The Appalachian Council of Governments (ACOG), as grant administrator for the Counties of Anderson, Oconee, & Pickens,

is soliciting proposals from qualified consulting firms to provide a framework for communities in the three county study area to develop broadband projects.

The master planning initiative is to result in the production of an existing conditions inventory; a needs assessment; goals, objectives, & priorities; & an implementation plan. The implementation plan is to include a network organization & operation section, broadband infrastructure section, funding strategies, & a community education & training section.

A subcommittee of five members will be formed to review & evaluate the proposals. The proposals will be evaluated & ranked based on the selection criteria. The subcommittee will develop a short list of the top ranked firms from the submitted proposals. The top ranked firms will be asked to attend a presentation interview as part of the evaluation process. The firms interviewed will be rated & ranked with the highest ranking firm then selected to negotiate a contract.

In evaluating the consultants, the following weighted criteria will be considered:

- 25% – The consultant's understanding of the project, proposed scope of services, & approach to the project, including how the consultant intends to facilitate public & other third party participation
- 25% – The experience & qualifications of the consultant in the type of research & analyses sought, & the professional qualifications & experience of the staff & any sub-consultants assigned to the project
- 20% – Past performance on similar analyses & ability to deliver all components of the requested services
- 10% – Availability of key staff & capacity to perform the proposed scope of work within the given timeframe, considering the current & planned workload of the firm
- 10% – Demonstrated knowledge of Federal & S.C. telecommunications law
- 10% – The proposed fee for telecommunications planning services

All project activities must be completed in full by September 30, 2008. Proposals are due no later than 2:00pm, local time, June 2, 2008. To receive a complete RFP or for further information, contact George McDaniel at (864) 241-4640 or e-mail at mcdaniel@scacog.org.
