## Intent to Sole Source

### TRIDENT TECHNICAL COLLEGE

It is the intention of Trident Technical College to sole source the procurement of:

Randox Monza Clinical Chemistry Analyzer Trainer

The Randox Monza is the only manufacturer that combines both a clinical chemistry analyzer and a coagulation module in one piece of equipment that is designed for education and clinical laboratory programs. This is a unique feature, as chemistry and coagulation instruments are typically separate. The Randox Monza is the only piece of equipment capable of replacing three pieces of equipment currently used in the college's programs that are no longer supported by their manufacturers.

Randox Monza is a brand name clinical instrument which is manufactured by Randox and available only through them. They supply the instrument, all parts and reagents. There is no other source for this instrument.

This Notice of Intent to Sole Source is to determine the availability of any other qualified contractor capable of providing the requested equipment or one that meets or exceeds the above-reverenced requirements.

The contact person for this intent to sole source is: Wendy Dennis, Procurement Specialist, Trident Technical College:

**TRIDENT TECHNICAL COLLEGE**

It is the intent of Trident Technical College to sole source a Fanuc Robotics Education Training Package and a Fanuc Project based Pill sorting system for use in Trident's Mechatronics program. Technical Training Aids is the exclusive reseller of FANUC products in South Carolina.

The college currently uses Allen Bradley automation products in the Automation Manufacturing Technology Lab and the new equipment must be compatible and seamlessly integrate with the existing equipment in order to create advanced lab exercises for that lab. The Fanuc is the only seamless integration and the equipment can be configured with the existing Allen Bradley PLC's.

Additionally, the Fanuc system features a unique Dual Check Safety Position and Speed System (DCS), which allows the robot to work safely in an "unfenced" work envelope without external dynamic axis limiting devices. The safety of students is of utmost importance in a training environment.

The Fanuc CERT robot training system is designed exclusively for technical education and includes written curriculum and practical lab exercises. FANUC America provides the necessary training to the instructor to become certified. Specific robot applications include: LR Mate 200iD/4S Robot, programming a logic controller, and using ROBOGUIDE simulation software. This educational product is only available for purchase by qualified technical educational institutions.

The Mechatronics program will serve the increased need for a trained workforce in the expanding advanced manufacturing and aviation sectors in the tri-county area including but not limited to Mercedes, Volvo, and Boeing. FANUC equipment is currently used in the industries in Trident's tri-county service area. As Trident is training a local workforce, it is essential that the students be trained on the equipment being used in tri-county service area to provide them the best opportunity for employment in these new, local companies.

**INCUMBENT WORKER TRAINING ASSISTANCE**

The Santee-Lynches Workforce Development Area (SLWDA) announces the availability of Incumbent Worker Training Assistance (IWT) under provisions of the Workforce Innovation and Opportunity Act of 2014 (WIOA). Funding is now available.

The purpose of this IWT Program is to assist employers in training currently employed workers in an effort to keep businesses and workers competitive.
